

DIATREME RESOURCES LIMITED

PROJECT LOCATION & SUMMARY

Cyclone
 3 EL's, 1 ML and 1 RL over the Cyclone Mineral Resource (211Mt at 2.3% HM) and surrounds.
Program
 Definitive Feasibility Study underway, PER preparation

Cape Bedford
 550km² EPM application covering extensive dune field known to contain silica sand and HM sands
Program
 Finalise Exploration Agreement with Hopevale, await EPM grant, conduct reconnaissance drilling

Tick Hill
 3 ML's over the Tick Hill Gold Mine (MIM 1991-95, 513koz Au at 22.6g/t Au)
 50% Farm-in by Superior Resources
Program
 Assess short term gold production opportunity, drilling for lode extensions

Grays Hill
 250km² EPM covering both coastal Quaternary sands prospective for HM and the Wasp porphyry Cu-Mo prospect
Program
 Reconnaissance drilling for HM, geology review at Wasp

Clermont
 3 EPM's covering 530km² of Anakie Inlier sequence prospective for porphyry Cu-Au-Mo mineralisation and mesothermal gold
Program
 Deep diamond drilling at Rosevale, shallow RC drilling at Palm Trees
